Dear HR,

It has been over 3 months of lockdown and we all are keen on resuming our work and bringing back the economy on track.

However, the big worry in the minds of Employers, is to make sure that the resuming staff is free from active infection of SARS Corona Virus and can safely join the office or production site without posing a risk to the other coworkers.

NM Medical now offers ICMR approved Antigen Antibody testing for your employees before they can safely resume their duties.

It is important that the organisation strictly follow this protocol so as to avoid spread of the disease later on and again reverting back to the dreadful lockdown!

By this time we all know the various uncertainty of Corona virus , an asymptomatic person can also be an active carrier. Hence temperature check or absence of cough and fever can be misleading.

These tests are done like any normal blood tests.

Collection can be made in groups either at your premises or else, they can visit any of our multiple locations from Vashi to South Mumbai including Pune and Bangalore Centres.

The results are available on the same day and depending on the results the necessary decisions can be made.

NM MEDICAL

We also provide group or individual counselling if required for the same.

We wish to bring our healthy staff back to work and so our economy as well.

For Individual Booking at any of our centre

WhatsAPP on

For Corporates bookings e mail on info@nmmedical.com
